

# Tools for the protection and management of Natural Spaces

The Foret d'Orient Regional Nature Park is full of Natural spaces, which must be preserved and protected by the Parks. In order to do so, the Park must combine different levels of protection.

## Natural heritage knowledge tools

### Natural areas of faunistic and floristic Interests (ZNIEFF)

They are places where rare, protected or endangered components (species, ecosystem, natural areas...) can be identified by scientists and validated by the natural history museum.

### Important Areas for bird Conservation (ZICO)

These areas are determined by the "BirdLife International"

In the Park territory, there is 1 ZICO (the Orient's forest) 35 800 ha made from wetlands and forests.

### Ramsar international convention

The Ramsar convention, (signed in Ramsar, Iran 02/02/1971) is an international treaty for the conservation and sustainable utilisation of wetlands. zone of interest for the bird migration.

## Preservation tools

### Prefectural order for the protection of biotope (APPB)

They favorise the protection of necessary biotopes, for feeding, reproduction, resting and survival of endangered species (fauna and flora)

### National nature reserves

Nature reserves are classified to preserve fauna, flora, soil, water, minerals and general natural spaces, which could be endangered by any intervention.

The Park is proud to have a National nature reserve !!! The nature reserve has been created mainly for the bird protection.

### Regional nature reserves

Regional nature reserves are classified by the Region or upon the owner's demand. The Park is co-administrator of the Courteranges reserve.
