Bodenham Lake Wildlife

Bodenham Lake is an important overwintering and breeding area for birds and other aquatic wildlife, so approximately half of the site is managed as a wildlife refuge with restricted public access. More than 160 species of birds have been recorded at this important site

The Nature Reserve is a good place to see otters (especially at dawn and dusk), great crested grebes, cormorants and kestrel (often seen in the orchard). 2015 sightings also included hobby and lesser redpoll.

Sightings

28th January 2017
