Protect local wildlife

We work with local groups, enthusiastic individuals, local schools and local councils, to deliver a range of marine-themed events and initiatives in all of our focus areas.

See [what's on](#) for all of our upcoming events.

Previous events in our focus areas have included:

- Snorkel safaris
- Workshops for local schools such as "Ocean giants" and "Love our living seaweeds"
- Talks and information events focused on local sustainable fisheries and industry
- Intertidal surveys and species monitoring

If you would like us to deliver a particular event, or if you would like assistance applying for funding for a local coastal or marine community project, please email us at livingseas@ulsterwildlife.org.
