Current Status - Mar 23, 2018 PDT

Amazon Web Services publishes our most up-to-the-minute information on service availability in the table below. Check back here any time to get current status information, or subscribe to an RSS feed to be notified of interruptions to each individual service. If you are experiencing a real-time, operational issue with one of our services that is not described below, please inform us by clicking on the "Contact Us" link to submit a service issue report. All dates and times are Pacific Time (PST/PDT).

  Service disruption

Status History

Amazon Web Services keeps a running log of all service interruptions that we publish in the table below for the past year. Mouse over any of the status icons below to see a detailed incident report (click on the icon to persist the popup). Click on the arrow buttons at the top of the table to move forward and backwards through the calendar. All dates and times are Pacific Time (PST/PDT).
