Personal & Professional Profile

My objectives are to work with open minded people. To share my experience with them as they tend to share their with me. To work for the greater good and to have fun doing it. To develop web applications and softwares that are extremely fast and leverage the power of the mashable web. This should lead the web towards increased interoperability, real-time data and effective, meaningful communication.

Skilled in many aspects of Programming, I strive to offer a high level of service and quality work to my customers. I have about 10 years of experience; working with many clients from various industries worldwide. I provide services in: Programming, Custom CMS, HTML, PHP, CSS (SASS/LESS), XHTML, ASP, JS, JQuery/AngularJs, Ajax, Flash, C#, C++, MSSQL, MySQL, Batch. I also have some experience in fields Java, JSF, .

I also made phone apps for iOS and Android, so for iOS I used Cordova/PhoneGap frameworks and for Android phone app I used its native language Java.

Technical Skills

Those technical skills are gained from experience and I have coverage programs for each skill.
