

---

# Krishanu De

Business Intelligence  
Consultant

Over 9 years of experience in Business Intelligence in designing and implementing Data Warehouses and transformation projects including Data Migration.

---

## Accomplishments

**As a developer**, worked in a distributed agile team to showcase a proof of concept within Base Company that Scrum can be adopted as a standard development framework across all verticals replacing existing waterfall model in entire organization.

---

**As a team leader**, led a collocated team (Kolkata, Pune, Bangalore and Milton Keynes) of 16 developers for BT Business having the responsibility of work package allocation to ensuring delivery of the assigned work packages within delivery timeline with least possible defect.

---

**As a solution designer**, designed a data mart for Campaign Management tool in Base Company that is capable of target customers based on segmentation parameters like usage information, bundles purchased, reloads done, campaign response, billing information, handset purchased etc.

---

**As a project coordinator**, managed a BI project from Base Company HQ, was responsible for interfacing

with customer and release management. Success of this project was awarded by a managed services contract to Tech Mahindra Limited and also a preferred vendor status for all innovation initiatives at Base.

---
