Short description

ACM is a full-service waste and recycling company focused on sustainability and zero landfill. It works with commercial clients to find inefficiencies and cost-savings within their waste streams and to develop new and innovative ways to reduce, re-use and recycle. ACM's holistic Greener Path Programme is a step by step journey towards 'zero waste' using effective rationalisation, expert logistics and leading-edge processing technologies. Our Zero Waste strategies focus on restructuring production and distribution systems, saving up to 40% of waste management costs.

WasteClear® aims for 100% diversion from landfill by identifying the ideal destinations for waste materials to be reprocessed and recycled. It will use the most efficient, cost effective and environmentally sound methods of enabling you to maximise resource recovery.

WasteTrack® is a revolutionary app-driven platform and client portal empowering waste producers to monitor and manage their waste streams.

- The Mobile App offers users 'on demand' waste collections (to ensure waste containers are emptied only when full)
- The Desktop Portal (ESP) provides accessibility to ACM's in-depth waste management operational and recycling data

The WasteWise® package provides professional guidance and on-site support from our expert teams. Learning & Development, Waste Minimisation and all Compliance matters are comprehensively addressed.

Information

ACM is a full-service waste and recycling company focused on sustainability and 'zero landfill'. It works with commercial clients to find inefficiencies and cost-savings in their waste stream and to develop new and innovative ways to reduce, re-use and recycle waste. ACM offers a proprietary web based client portal and Mobile App that enables clients to order 'on demand' waste collections and track all aspects of their recycling and energy recovery performance. By following the three routes to zero waste, ACM are committed to ending the "throw-away" culture that exists in society.
