Teflon coated fabrics
PTFE coated fiberglass

Add Your Rating:

Business Description

Urja Fabrics are the makers of Fiber Glass Products and a set up name since the year 1989. We have understanding of running a composite material factory having 650 Looms and 40000-odd Spindles.

We wandered into the field of Technical Textiles choosing Fiber Glass as the base. Polypropylene, Nylon, Polyester, Acrylic, Mod-Acrylic, Nomex, Aramid, Peek, Carbon and different strands stuck to this same pattern. Fiber Glass with its adaptable properties is utilized for some an application. The name Urja Fabrics has turned out to be synonymous with Fiber Glass Fabrics in the course of the most recent four decades. Urja, a private restricted organization, was shaped with a view to assembling Silica textures. Unnati was converged into Urja Products along these lines extending the skylines for URJA, which is presently situated at two locales one kilometer far from each other.
