Lime VPN @ 25 May 2018

The virtual private network is also known as VPN that helps an individual, company or an organization by providing safe access to the internet without the risk of the third party stealing the information shared between the sender and receiver. A good **VPN service provider** works to cater to the security and privacy needs of the customers by understanding their requirements. The **Best VPN provider** supports the customers by providing valuable feedback and suggestions. The role of a **VPN service provider** is to make sure the customer understands the need to protect their data and information from the hackers at their workplace as well as home. Having access to the VPN services protects an individual's data from the corporate companies that otherwise exploit the information for their benefits.

Indeed. A VPN plays a vital role while traveling or using the Internet over a Public Wifi or using the Internet in a public place. If you don't have a VPN installed on your phone or your laptop, then you might be exposed, and you can be hacked easily. To avoid such issues, you need to have a premium VPN service provider. Now the problem is if you think that VPNs are costly, then the answer is NO. There are other best [cheap vpn](#) services which are less expensive in rates, and they don't compromise on user's Online security. With the help of powerful encryption protocols, you can easily circumvent the potential threats and can make the best use out of it. Plus what you can do is it can help you to bypass throttling done by your ISP and can unblock streaming content in no time.

While my quest for the cheapest VPN services with good quality connection, no logs policies and quite a faster speeds, I found this list. These are the top 20 VPNs with least monthly price and I found no better than this. This might help you a s well:

Don't fall into the trap of cheapest and most affordable services may it be vpn or any other services. Services are the ch eapest or free for a reason. If you are not paying or paying a nominal amount then always remember you are the produ ct as nothing is free in this world. Instead, go for the reputable and audited vpns which in my knowledge are IPVanish an d NordVPN. Both have great features along with exceptionally good services. You can also see there comparison here [ht tps://www.reviewshed.com/ipvanish-vs-nordvpn/](https://www.reviewshed.com/ipvanish-vs-nordvpn/)

Please do let me know if you like my opinion and if I have missed anything.
