EARTHQUAKE ENGINEERING RESEARCH INSTITUTE

Founded in 1948, EERI's mission is to reduce earthquake risk by (1) advancing the science and practice of earthquake engineering, (2) improving understanding of the impact of earthquakes on the physical, social, economic, political, and cultural environment, and (3) advocating comprehensive and realistic measures for reducing the harmful effects of earthquakes.

NEWS OF THE INSTITUTE

Board of Directors announce Heidi Tremayne the next Executive Director of EERI

The Board of Directors is extremely pleased to announce, following a rigorous 4 month search process, that we have unanimously selected Heidi Tremayne as the next Executive Director of the Earthquake Engineering Research Institute.

Many of our members know Heidi in her current role as Program Manager for EERI, a role she has held since 2014. Previous to joining EERI, Heidi served in the role of Outreach Director at the Pacific Earthquake Engineering Research Center at UC Berkeley from 2008 to 2014. And overlapping that time frame, from 2009 to 2014, Heidi held every leadership position, from Director to Treasurer to President, of the Northern California Chapter of EERI.

Heidi is a dynamic, articulate and passionate leader and we are thrilled to have her as the next Executive Director of EERI.

The search for a new Executive Director began in November, 2016, after Jay Berger announced his intention to step down after 7+ years of stellar leadership and stewardship. A search committee, as a sub-committee of the Board, was formed with David Friedman (incoming President) as the chair, and included President Mary Comerio, and Directors Jim Malley, Danielle Mieler and Janiele Maffei.

The search committee developed a meticulous position description and honed in on the attributes and skill sets needed to lead EERI. The selection criteria included: knowledge of the earthquake professions, knowledge of non-profit governance, management experience, passion and concern for earthquake safety, writing and communication skills, fund-raising and member development and people skills.
Considerable outreach was done to source as many qualified applicants as possible. And there were many, including local, national and international applicants. The quality level of the applicants was very high.

The committee reviewed the pool of applicants and selectively went from short-list to semi-finalists to finalists. Though our applicants did not complain, at least out loud, there were several interviews, writing assignments, “think pieces” on the Strategic Alignment initiatives, and thorough reference checking. We had two absolutely fantastic finalists, but the committee’s recommendation to the Board was unanimous and the full board vote was unanimous: Heidi Tremayne!

For those joining attending the Annual Meeting in Portland next month, you will be able to join the Board in welcoming Heidi as the next Executive Director as well as to thank Jay for his superb tenure as Executive Director. Heidi will officially take over as Executive Director on March 20, 2017. Jay has been generous with his availability through March for ample transition time, and he will be available as a resource for Heidi and many of the standing committees throughout April.

EERI Outstanding Student Paper Awardees: Barbara Simpson and Viviana Vela

The following students were awarded 2016 EERI Outstanding Graduate and Undergraduate Papers. Winners will receive recognition at the 2017 EERI Annual Meeting.

Graduate Student Paper Award
"Reducing Concentrations of Inelastic Demand with a Strongback"
**Barbara Simpson, University of California, Berkeley**

**Barbara Simpson** (M. EERI, 2016) is presently a doctoral candidate at UC Berkeley. She received her Bachelor of Science from the University of Kansas and Master of Science from UC Berkeley. Prior to beginning her graduate studies, she worked for nearly a year at Thornton Tomasetti in both the Kansas City and Los Angeles design offices. Her research with Professor **Steve Mahin** (M. EERI, 1975) focuses on the performance and retrofit of existing steel braced frames funded by an NSF research grant. As a part of this research, she has designed, built, and tested three nearly full-scale steel braced frames, including one strongback, or "mast" retrofit designed to improve braced frame performance.

Undergraduate Student Paper Award
“Effectiveness of Rubber Bumpers as a Mitigation Measure for Pounding in Base Isolated Structures”
**Viviana Vela, University of California, San Diego**

**Viviana Vela** is currently a graduating senior pursuing an undergraduate degree in Structural Engineering with a civil focus at the University of California, San Diego. She is a McNair Scholar working as a research assistant with Professor **Gilberto Mosqueda** (M. EERI, 2001) focusing on seismic isolation and examining the behavior of this system under extreme earthquake motions. Specifically, Viviana has been analyzing the effectiveness of rubber bumpers as a mitigation measure for pounding on moat walls in base isolated structures. Upon graduation, she
plans to continue in higher education and attain a PhD in Civil Engineering with a concentration in structural engineering. Viviana intends to conduct research focused on earthquake engineering and pursue a career in academia in hopes that her leadership role in academia and research will empower and inspire other women and minorities to continue pursuing careers in engineering.

The purpose of the EERI Outstanding Student Papers Competition is to promote active involvement of students in earthquake engineering and the earthquake hazards community. Graduate and undergraduate students compete by submitting papers that are original work. The papers are judged based on their contribution to the field and their overall quality.

Each paper is ranked on technical merit, clarity of expression, and relevance for the earthquake.

- EERI 69th Annual Meeting is One Week Away!

The Earthquake Engineering Research Institute's 69th Annual Meeting is next week, March 7-10, 2017, in Portland, Oregon. Full program details are available on the 2017 Annual Meeting website, and with only one week to go, there is still time to register!

The 33 teams competing in the 2017 Seismic Design Competition promise to bring excitement and action to the very heart of the Annual Meeting, and you can be a part of it by volunteering to be a judge! If you are interested in becoming a SDC judge, please complete the online form or email slc@eeri.org.

- 2017 Housner Fellows Program Applications due March 31, 2017
The Housner Fellows Program is seeking six exemplary young professionals from among our members who are dedicated public policy advocates committed to earthquake risk mitigation. Fellows will participate in a Leadership Institute and develop a group project that makes a real impact in the field. Members from all disciplines are encouraged to apply. EERI is accepting applications for the 2017 Housner Fellows class through March 31, 2017. Apply Online.

Eleventh U.S. National Conference on Earthquake Engineering
Integrating Science, Engineering, and Policy
June 25-29, 2018
Los Angeles, California

Purpose: The Eleventh U.S. National Conference on Earthquake Engineering (11NCEE), on the 70th Anniversary of the forming of the Earthquake Engineering Research Institute (EERI), will provide an opportunity for researchers and practitioners to share the latest knowledge and techniques to better understand and mitigate the damaging effects of earthquakes and tsunamis. With the theme “Integrating Science, Engineering, and Policy,” the conference will bring together professionals from the full spectrum of the earthquake community to discuss and debate a multitude of issues related to seismic hazard, risk, mitigation and public policy. EERI is organizing this conference in collaboration with the Southern California Earthquake Center (SCEC).

Paper Formats: The 11NCEE is accepting two paper types for the proceedings. The full paper option has a limit of ten pages, and the extended abstract paper option has a limit of four pages with a maximum title length of 80 characters and maximum text length of 400 words. Paper body text will be Times Roman 12-point and single spaced.

Call for Papers: The deadline for submission of abstracts is May 31, 2017. The abstract collection system is open. Authors must submit abstracts and papers online. Authors will receive notification of provisional acceptance of their abstracts by August 15, 2017. Final papers, both full and extended abstracts, must be received by October 31, 2017. Additional detailed instructions are available on the conference website.

Special Sessions: The conference will include a small number of special sessions. Attractive special session proposals cross disciplinary and general topic boundaries, and raise challenging issues. The program committee is particularly interested in special session proposals that relate to the conference theme of integrating earthquake science, engineering, and policy, and those that address the hazards, risks and policies related to Southern California, the setting for the conference. Special sessions can be mini-workshops, panels, debates or other unique and engaging formats. Those interested in proposing a special session can find directions on the conference website. The deadline for submitting special session requests is March 31, 2017. Special session proposers will be notified of acceptance by April 30, 2017.
LEARNING FROM EARTHQUAKES

- New Report Summarizing Impacts from the M7.8 Earthquake in Kaikoura, New Zealand Available Soon

This content will appear soon in an upcoming issue of The Pulse.

MEMBER SPOTLIGHT MARCH 1, 2017

- Three Longtime Members of EERI Elected to the National Academy of Engineering

Ross Boulanger (M. EERI, 1992), Bill Holmes (M. EERI, 1975), and Sergio Alcocer (M. EERI, 1987), three longtime members of the Earthquake Engineering Research Institute, have been elected as new members of the National Academy of Engineering. The EERI Board of Directors congratulates these outstanding engineers, all of whom currently serve or have served on the EERI Board.

Election to the National Academy of Engineering is among the highest professional distinctions accorded to an engineer. Academy membership honors those who have made outstanding contributions to “engineering research, practice, or education, including, where appropriate, significant contributions to the engineering literature” and to “the pioneering of new and developing fields of technology, making major advancements in traditional fields of engineering, or developing/implementing innovative approaches to engineering education.”

Ross Boulanger is Director of the University of California, Davis Center for Geotechnical Modeling. Ross has received NAE recognition for contributions to geotechnical earthquake engineering and the development of procedures for evaluating seismic behavior of soil-structure systems. Professor Boulanger joined the EERI Board of Directors in 2016.

William T. (Bill) Holmes, Senior Consultant, Rutherford & Chekene Consulting Structural Engineers, San Francisco. Bill has been recognized by the NAE for excellence in structural design and leadership in improving the seismic safety of buildings. In 2016, he
was awarded with an EERI Honorary Membership for his many outstanding contributions to the Institute.

Sergio Manuel Alcocer, Research Professor, Institute of Engineering, National Autonomous University of Mexico, Mexico City. Sergio has received NAE recognition for improvements to the seismic safety of buildings in developing countries through improved design standards and government policies. Professor Alcocer was a member of the EERI Board from 2001 to 2003.

Individuals in the newly elected class will be formally inducted during a ceremony at the NAE's annual meeting in Washington, D.C., on Oct. 8, 2017. For more information, see the NAE press release.

Damage from Earthquakes in Central Italy Seen Costing €23.5 Billion

The total monetary amount of damages caused by the tremors that shook Central Italy has cost more than €23 billion. Read more
Earthquake Spectra: February Issue and Preprints

The February 2017 issue of Earthquake Spectra (volume 33, number 1) is now available in print and online where you may browse the table of contents for your favorite topics, such as:

- Empirical Terrain-Based Topographic Modification Factors for Use in Ground Motion Prediction Manisha Rai, Adrian Rodriguez-Marek (M.EERI,1999), and Brian S. Chiou
- Quantifying the Reduction in Collapse Safety of Main Shock-Damaged Reinforced Concrete Frames with Infills Henry V. Burton (M.EERI,2011) and Mayank Sharma (M.EERI,2015)

Five preprint manuscripts have been posted to the Earthquake Spectra website prior to formal publication. The papers to be published are:

- A Set-Based Approach to Support Decision-Making on the Restoration of Infrastructure Networks by Mehmet Unal (M.EERI,2012) and Gordon P. Warn
- Conditional Mean Spectra Given a Vector of Spectral Accelerations at Multiple Periods by Tadahiro Kishida (M.EERI,2005)
- Hazard Disaggregation and Record Selection for Fragility Analysis and Earthquake Loss Estimation by Luis Sousa (M.EERI,2016), Mário Marques, Vitor Silva (M.EERI,2014), and Humberto Varum

Compiled Index of EERI Oral Histories Now Available
The valuable history collected in the first twenty-four EERI Oral Histories has now been made more accessible and useful by having the individual indexes of these volumes compiled into one master index.

The index provides an easy way to find information on a given earthquake, piece of legislation, engineering innovation, type of construction, or other topic that appears in the first twenty-four publications, which now comprise nearly 5,000 pages. The compiled index is searchable as a pdf document.

This aid should be of benefit to researchers, instructors and students, and the general reader.

Opportunity to serve on the Oral History Committee

The Oral History Committee is responsible for the production of the oral history volumes (most recently on Edward Wilson and Ray Clough). The Committee meets to propose candidates (then approved by the Board of Directors), conducts interviews, and works on what turns out to be the more labor-intensive post-interview phase that involves tasks such as editing, researching footnotes, obtaining photographs, and copyreading final versions.

EERI members interested in applying to join the Committee and take on work related to its activities should contact Rita Wilds, EERI Membership & Communications Manager (rwilds@eeri.org), with a brief statement of interest.

Members with suggestions for future oral history candidates can also contact her, describing how suggested individuals (1) have made an outstanding career-long contribution to earthquake engineering; (2) have valuable first-person accounts to offer concerning the history of earthquake engineering; and (3) have backgrounds, considering the Series as a whole, that appropriately span the various disciplines that are included in the field of earthquake engineering.
Regular
Jaime Cerros, Geotechnical Exploration Inc, Geotechnical
Kirk Ellison, Arup
David Finn, David Finn Architects, Architect
Corina Forson, Washington Dept. of Natural Resources
Chris Garris, Geotechnical

Michael Little, University of Texas - Austin, Geotechnical
Jerry Luong, Cal Poly San Luis Obispo
Ethan Marks, Rice University, Civil
DONATIONS

EERI Endowment Donors

EERI would like to thank donors to the Endowment Fund and acknowledge their recent contributions. EERI's Endowment supports innovative projects that assure the Institute's continuing leadership in the earthquake engineering profession.

The list below reflects recent donations to the Institute.

$100 - $250
James Goltz
Phillip Gould
Cynthia Perry
Solveig Thorvaldsdottir
Stan Zagajeski

Other Amounts
Archanaa Dongre
Cindy Hoover
Nilesh Shome
Kenneth Topping

Thank you for your support!

CALENDAR

Follow these steps to add EERI Calendar to your own Google calendar.

1. Open Google Calendar
2. On the left, above "My Calendars," click Add + and then From URL.
3. Enter the EERI calendar's address in the field provided. EERI Calendar ics link
   https://calendar.google.com/calendar/ical/eeri.org_s9151tit0ab26dnf2epn25d7rg%40group.calendar.google.com/public/basic.ics
4. Click Add Calendar. The calendar will appear on the left side under "Other calendars."

Monday, April 27, 2020 - April 30
**SSA 2020 Annual Meeting**
SSA 2020 Annual Meeting
27-30 April 2020 — Albuquerque, New Mexico
The 2020 Annual Meeting will be held in Albuquerque, New Mexico.
Check back later for more information.

Friday, May 15 2020 5:00 PM - May 16 2:00 AM
**2020 Los Angeles Tall Buildings Conference**
The 2020 Los Angeles Tall Buildings Structural Design Council conference will cover a variety of topics related to recent advances in structural design of tall and special buildings. Learn more: [www.latallbuildings.org](http://www.latallbuildings.org)

Monday, September 14, 2020 - September 18
**17th WCEE**
The 17th WCEE will be hosted in Sendai, Japan, from September 14th to 18th 2020. Check [http://www.iaee.or.jp/](http://www.iaee.or.jp/) for more information.

Sunday, February 07, 2021 - February 10
**ASCE/UCLA San Fernando Earthquake Conference**
