NEWS OF THE INSTITUTE

▶ [11NCEE DETAILED PROGRAM SCHEDULE NOW AVAILABLE!](#)

11th National Conference on Earthquake Engineering
integrating science, engineering, & policy

11NCEE INVITED SPEAKERS

EERI is pleased to announce the release of the full detailed technical program for the 11th U.S. National Conference on Earthquake Engineering (**11NCEE**).

Plan ahead to prioritize, strategize, and optimize your conference experience!

We invite you to browse the detailed [Program Schedule](#) and [Schedule-at-a-Glance](#).

[REGISTER NOW](#)

Throughout the week of the conference (June 25-29, 2018) you will have many options to choose from, including:

- **67 Technical Topic Sessions** spanning a variety of topics and disciplines;
- **43 Special Sessions**, each with a unique interactive format and topic;
- **200+ Posters** on display;
- **Ten (10) Five-in-Five (5-in-5) Sessions** of 12-15 presentations each;
- **Nine (9) Concurrent Theme Sessions**;
- 40 teams competing in the 15th Annual Undergraduate Seismic Design Competition;
- Dynamic **plenary speakers** daily covering seismic hazard, risk, and policy;
- EERI's 70th Annual Meeting and Awards Luncheon; and
- Exciting social and networking events all week highlighted by a **special reception hosted by Computers and Structures, Inc.**

(CSI)

REGISTER NOW – Conference registration rates increase on June 1, 2018.

Please **make your room reservation at the Westin Bonaventure Hotel & Suites** as soon as possible. **Our block of hotel rooms at the reduced rate ends June 1, 2018!** Rooms may be available after the cut-off date, but they will be offered at a higher rate. Government hotel rates are available. Please contact us at 11ncee@eeri.org for assistance booking a room at the government rate.

For general questions about the conference and sponsorship opportunities please email 11ncee@eeri.org

EERI MEMBER SPOTLIGHT

▶ Robert E. Bachman named a Distinguished Member of the American Society of Civil Engineers

Robert E. Bachman (M.EERI,1982), P.E., S.E., F.SEI, M.ASCE, was named a Distinguished Member of the American Society of Civil Engineers (ASCE). This is the highest honor to which a civil engineer can aspire; in the Society's 163-year history only 698 people have been elected to the honor. He will be inducted on Sunday, October 13, 2018 at the Celebration of Leaders Luncheon during ASCE's 2018 Convention in Denver, Colorado.

Bachman is recognized for the development of modern seismic design provisions adopted into the building codes of California and the United States. For the past 18 years he has been the senior principal of his own consulting structural engineering practice in Laguna Niguel, Calif. Bachman's work to improve life safety, cost-efficiency and resiliency have made him a leader in the practical advancement in seismic resistance of structures, components and equipment of all types.

As the chair of the Structural Engineers Association of California (SEAOC) State Seismology Committee, Bachman led the reorganization and development of landmark seismic provisions of the 1997 Uniform Building Code including an unfunded effort to create, develop and publish near field ground motion maps that allowed for the consideration of higher seismic forces near faults for the first time in the state's history. Bachman also led the user-friendly focused development of a second set of landmark seismic provision found in ASCE 7-05. Since its inception in 1989, Bachman has led the development of Seismic Guidelines for the

Robert Bachman

California Risk Management and Prevention Program and California Accidental Release Prevention Programs. These guidelines focused on seismic evaluations of existing industrial facilities that contain hazardous materials, and as a result of his work on this project, the new guidelines have been adopted by jurisdictions throughout California and are utilized throughout the world.

YOUNGER MEMBERS COMMITTEE WEBINAR

► Webinar now available for viewing: "[Assessing Safety, Search and Rescue: An Engineer's Role Following Disasters](#)"

Speaker: **John Lawson, SE** (M.EERI, 1985)

[VIEW THE WEBINAR](#)

On May 2, 2018, EERI Younger Members Committee (YMC) hosted a webinar by **John Lawson** (M.EERI,1985) entitled, "Assessing Safety, Search, and Rescue: An Engineer's Role Following Disasters." The presentation focused a small group of engineers that volunteer to serve the public by jumping at the chance to evaluate potentially dangerous buildings up close following disasters. A recording of the webinar presentation is now available on [EERI's YouTube channel](#).

John Lawson is a licensed Structural Engineer in California and Arizona where he has over 30 years of consulting experience in design and evaluation of buildings. He has a Masters degree in Structural Engineering from Stanford University, and a Bachelors in Architectural Engineering from Cal Poly San Luis Obispo, where he is also currently an Associate Professor.

Mr. Lawson is also a Structural Specialist in FEMA's Urban Search & Rescue program, with special training in collapsed structures, and has been deployed to earthquakes, hurricanes, mudslides and the Oklahoma City Bombing.

OPPORTUNITIES

► Judges needed for the 15th Annual Undergraduate Seismic Design Competition

APPLY NOW - the deadline has been extended to June 1, 2018!

Do you have a desire to help future structural engineers succeed?

Do you have fond memories of your undergraduate Seismic Design Competition team experience?

Then you should volunteer to be a judge for the 15th Undergraduate Seismic Design Competition (SDC) at the Eleventh National Conference for Earthquake Engineering (11NCEE)!

The EERI Student Leadership Council is excited to announce the 15th Undergraduate Seismic Design Competition (SDC) at the Eleventh National Conference on Earthquake Engineering (11NCEE) in Los Angeles, California, in which 40 teams from all over the world will be participating. While the competition is organized by the Student Leadership Council, it is largely a collaboration with the EERI leadership and conference attendees.

We are looking for professionals and academics from all backgrounds to help us with the competition judging, which will take place throughout Tuesday June 26th. The time commitment for each judge will be about 1 hour, and no previous judging experience is required. This is a wonderful and rewarding opportunity to interact with the next generation of earthquake engineers! Judges can choose from SDC team presentations, posters, and architecture of the building models created by the teams.

If you are interested in becoming a SDC judge, please **apply** by June 1, 2018. Please be sure to indicate the time(s) you can volunteer on the form.

We appreciate your participation with the Student Leadership Council.

► Job Posting: Post-Doctoral Research Associate, Lehigh University

The Lehigh University Department of Civil and Environmental Engineering: **Professor Dan M. Frangopol** (M.EERI, 1987), Fazlur R. Khan Endowed Chair of Structural Engineering and Architecture, Center for Advanced Technology for Large Structural Systems (ATLSS Center), is looking for a Post-Doctoral Research Associate on projects related to life-cycle reliability and risk, maintenance, health monitoring, management and optimization of civil and marine infrastructure systems. Candidates must have a Ph.D. and strong background and research accomplishments in structural engineering in one or more of the following areas: Structural Reliability and Probabilistic Methods, Risk Assessment and Decision Making under Uncertainty, Climate Change Adaptation, Monitoring-Maintenance-Management-Cost of Civil and Marine Infrastructure (particularly bridges and ships), Structural Optimization, and Life-Cycle Engineering.

Lehigh has internationally respected programs and outstanding structural research facilities including the Computational Laboratory for Life-Cycle Civil Engineering. The interdisciplinary research program brings together internationally recognized faculty and staff that have a well-established tradition of developing and implementing technology.

Starting date is June 2018, but is negotiable.

Applicants should send a detailed resume, along with the names and addresses of three references to: Geri Kery, Coordinator to

► 2018 Fall/Winter Post-Graduate Internship Opportunity at EERI Deadline Extended

APPLY TODAY!

Application Deadline Extended to May 25, 2018

The Earthquake Engineering Research Institute (EERI) has an internship position available for recent graduates who are interested in gaining valuable professional experience while supporting the Institute's mission to reduce earthquake risk. Fall/Winter internships begin in July 2018 with an end date in January 2019. Applications should be submitted by May 25, 2018.

EERI internships are approximately six-months long, and offer engagement with a number of interesting EERI projects and Institute activities, including [Learning from Earthquakes](#), the [School Earthquake Safety Initiative](#), [World Housing Encyclopedia](#), [EERI Annual Meetings](#), technical seminars and webinars.

Tasks are varied, although day-to-day work focuses on supporting EERI projects and staff through research, project and event coordination, and website development and maintenance.

Interns are expected to work in EERI's Oakland, California office, which means living in the San Francisco Bay Area. (No moving or housing support provided). EERI interns are provided a monthly stipend of \$2,200 (\$2,500 for recent graduate students).

Interested candidates should [apply here](#). Preference is given to EERI members. Applications should be submitted by May 25,

2018.

ANNOUNCEMENTS

▶ [SimCenter Programming Bootcamp](#)

[More Information/Register](#)

Date: July 30 - August 3, 2018

Location: Richmond Field Station, Richmond, CA

Early-bird registration with a \$100 discount is available until June 22.

Applications for travel support are due by May 25.

The NHERI Computational Modeling and Simulation Center (SimCenter) is hosting a “SimCenter Programming Bootcamp.” The overall goal of the bootcamp is to train researchers in programming paradigms not covered in traditional civil engineering courses, but which are needed to advance their capabilities with regard to simulation for natural hazards engineering. The target audience is graduate students, postdocs, and new faculty who are interested in simulating the effects of natural hazards on components, structures, and communities. By the end of the workshop, participants will have a firm grasp of how to build applications that utilize SimCenter products and run on the high-performance computing platform hosted at [DesignSafe-CI](#).

WELCOME NEW EERI BRONZE LEVEL SUBSCRIBING MEMBERS

► CoreBrace and Golder Associates

CoreBrace is a manufacturer of buckling restrained brace frames (BRBs) and other structural steel bracing products. All aspects of the CoreBrace BRB Fabrication process, from initial design coordination to inspection, fabrication and shipping, are performed at our AISC certified facility in West Jordan, Utah, USA. We have successfully tested over 60 full scale BRBs and are continually looking for new opportunities through ongoing research and development. We have successfully completed hundreds of projects throughout the world, including projects in The United States, Canada, New Zealand, Turkey, Papua New Guinea, Haiti, South America and elsewhere. We have been privileged to be involved with a wide range of project types including, hospitals, universities and schools, office buildings, stadiums, libraries, manufacturing facilities, industrial plants, and transportation hubs. The steady growth we have experienced has allowed us to increase our staff and expand our fabrication facility and production capacity, allowing CoreBrace to meet the continually growing demands for high quality BRBs. www.corebrace.com

Golder Associates has investigated earthquake hazards and provided earthquake engineering solutions for more than 50 years. We provide site-specific seismic hazard assessments and geotechnical earthquake engineering for projects located throughout the world. Based on our earthquake hazard and engineering advice, project owners have successfully licensed and built dams, power plants, bridges, nuclear energy and waste facilities, liquefied natural gas plants, pipelines, and hazardous waste facilities. Golder professionals provide seismic and geologic hazard services through all the stages of major development projects. Golder's seismic hazard and engineering recommendations assist in a project's environmental impact assessment, prefeasibility, feasibility, design, and construction stages. www.golder.com
