**Curriculum**

There are three courses offered to Overseas students and each has been accredited by NCFE. These cover Air Cabin Crew training within an Airline Diploma and Aviation Operations on the Ground (Knowledge) training covering check-in, customer service, health & safety, security and departures and arrivals within an Airport Diploma – all these include some additional Soft Skills topics; both run for three months each. These two options are also combined to offer an Airline & Airport Diploma which runs for five months duration. Currently individual modules from these two courses are provided to many visiting colleges and school as part of the Air Cabin Crew, Aviation Operations, Travel & Tourism as well as Uniformed Public Services courses run by those colleges and schools.
