

GI Clinic (Endoscopy)

80 Jesse Hill Jr Drive SE Atlanta, GA 30303 | (404) 616-4358 | *Monday - Friday, 8 a.m. to 4:30 p.m*

Endoscopies are non-surgical procedures designed to examine, diagnose, and treat gastroenterological conditions from the inside, using a flexible tube with a light source and camera attached. Endoscopies performed at Grady include Upper endoscopies and Colonoscopies.

The majority of our patients do not require general anesthesia but are given conscious sedation. Treatment is usually performed on an outpatient basis.

The specialized team of endoscopy nurses and technicians will guide you through the process during your visit and provide detailed, procedure-specific discharge instructions.
