TN50: ADAKAH MALAYSIA AKAN MEMPUNYAI KEKAYAAN SUMBER ATAU KETANDUSAN SUMBER MENJELANG 2050?

FRIDAY, FEBRUARY 02, 2018 | [Comments\(0\)](#)

01 November 2017 Surat Kepada Pengarang TN50: ADAKAH MALAYSIA AKAN MEMPUNYAI KEKAYAAN SUMBER ATAU KETANDUSAN SUMBER MENJELANG 2050? Tahun 2020 di pilih untuk membawa Malaysia masuk ke kelab eksklusif negara-negara maju. Walaupun banyak statistik ekonomi boleh digunakan sebagai kayu ukur untuk meneliti pencapaian kita, ke manakah kita sedang tuju? Marilah kita imbas semula unsur-unsur penting yang secara senyap-senyap menyokong pertumbuhan negara kita. Air, tenaga dan alam sekitar telah

TN50: WILL MALAYSIA BE RESOURCE RICH OR RESOURCE POOR IN 2050?

FRIDAY, FEBRUARY 02, 2018 | [Comments\(0\)](#)

01 November 2017 Letter to Editor TN50: WILL MALAYSIA BE RESOURCE RICH OR RESOURCE POOR IN 2050? 2020 is the year chosen to bring Malaysia into the exclusive club of developed nations. While many economic statistics can be used as a yardstick to measure our achievements, where are we heading? Let us revisit the important elements that have silently supported our nation's growth. Together water, energy and environment played an important role in developing Malaysia as a nation and a.....

LETTER TO EDITOR - 24 January 2014 PLANNING FOR A WATER CRISIS? Association of Water and Energy Research Malaysia (AWER) has stressed the need for higher reserve margin of treated water and protection of water catchment areas numerous times. In recent weeks, we can see the impact of weather pattern change to our water resources. Is There A Lesson To Learn? Lesson number one: drought or prolonged period without rain or with very little rain is part and parcel of our climate. This is not the.....

SOLVING FLOOD USING NATURE'S WAY

SUNDAY, DECEMBER 15, 2013 | [Comments\(1\)](#)

15 December 2013 SOLVING FLOOD USING NATURE'S WAY Flood issues has been haunting Malaysians for many years. The occurrence of flood becomes more and more virulent. We live in equilibrium with nature, that's Association of Water and Energy Research Malaysia's (AWER) stand. Disturb that equilibrium and we will have to face the consequences. Which again proves Newton's third law (universal law), every action has an equal and opposite reaction. It has been reported that the cabinet.....

PRESS RELEASE: Malaysia and ASEAN Must Speed Up Energy Efficiency Implementations to Avoid Being Dumping Ground of Non-Energy Efficient Products

SUNDAY, APRIL 08, 2012 | [Comments\(0\)](#)

PRESS RELEASE DATE: 8th APRIL 2012 (SUNDAY) MALAYSIA AND ASEAN MUST SPEED UP ENERGY EFFICIENCY IMPLEMENTATIONS TO AVOID BEING DUMPING GROUND OF NON-ENERGY EFFICIENT PRODUCTS Energy efficiency (EE) implementation across the world is limited due to many factors. However, growing demand for energy resources has been the ultimate reason behind this. In addition to that, being energy efficient also reduces operational cost and adds the 'green' perspective to businesses. Some countries.....

Financial Modelling by AWER is Correct!

SUNDAY, MARCH 20, 2011 | [Comments\(0\)](#)

Media statement by National Water Services Commission (Suruhanjaya Perkhidmatan Air Negara-SPAN) mentioned that our calculation is not accurate. Financial modelling done by World Bank is actually referring to average tariff and NRW recorded in certain countries. Meanwhile, AWER's financial modelling used official statistics, that are the NRW and lowest tariff in each state instead of average tariff (by World Bank). Average tariff is higher in value compared to lowest tariff. In Malaysia,.....

Water Sector Needs Unification

MONDAY, MARCH 14, 2011 | [Comments\(0\)](#)

The assurance given by YAB Prime Minister in tackling water related issues is a very important milestone in Malaysian history. Water is National Security and our failure will lead to both raw water security and supply security problems. One of the main issues AWER has observed is that the management of water throughout the usage cycle is still segregated. Many agencies are involved and integrated efforts are not in place. Climate change gives direct impact to water sources, but the divided water.....

Fukushima Daiichi Nuclear Power Plant

SUNDAY, MARCH 13, 2011 | [Comments\(0\)](#)

The Nuclear power plant Fukushima Daiichi's cooling system have failed and caused overheated nuclear reactor. Experts fear a meltdown of reactor rods. This may lead to unwanted incident. If the core reactor explodes, there will be huge radiation risk. Let us hope, things can come under control.....

KL MRT Project Detailed Environmental Impact Assessment (DEIA) Report is Vague

SATURDAY, FEBRUARY 26, 2011 | [Comments\(1\)](#)

Association of Water and Energy Research Malaysia (AWER) is in support for an effective public transport system. However, in the case of KL MRT project, the DEIA report submitted to Department of Environment (DOE) is vague and does not prove that the project can improve the environmental quality in Klang Valley. AWER have studied the DEIA report and submitted comments to Director General of DOE on 25th February 2011. Based on AWER's findings, the DEIA should not be approved. Main points.....

Non-Revenue Water (NRW) in Malaysia: Who Gains and Who Loses

MONDAY, FEBRUARY 21, 2011 | [Comments\(0\)](#)

Association of Water and Energy Research Malaysia (AWER) has carried out a modeling study on financial loss caused by NRW in Malaysia. The modeling took into consideration of total treated water loss, category of users and lowest average tariff of each state. According to Malaysia Water Industry Guide 2010, average NRW recorded in year 2009 was 36.63% compared to 36.93% in year 2008. The total treated water loss due to NRW is about 1.8 billion cubic meters in year 2009. Pahang recorded highest.....

MRT Project Will Cost Road Users More Than RM 403.5 Million in 5 Years Operation If Wrongly Designed

SATURDAY, FEBRUARY 12, 2011 | [Comments\(0\)](#)

In Malaysia, we have been using high amounts of fossil fuel for transportation sector. According to National Energy Balance 2008 (latest report), there has been steady increase in the usage of fossil fuel in transportation sector from 12,071 ktoe (kilotonne oil equivalent) in 2000, 15,384 ktoe in 2005 and 16,395 ktoe in 2008. Such increase definitely can be curbed if there is good development in public transportation sector. If we introduce an effective MRT system, we can save the energy wastage.....

Car sales are up: Are they Energy Efficient?

WEDNESDAY, JANUARY 26, 2011 | [Comments\(0\)](#)

Malaysia Automotive Association (MAA) has announced that the passenger vehicle sales are the highest in 5 years for 2009 and will continue to grow. This is a serious trend that we need to monitor. The Department of Environment's 2009 Annual Report states that we have 8,940,230 motorcycles; 8,506,080 passenger cars; 936,222 goods vehicles; 79,149 taxis and 66,581 buses registered in Malaysia. In the same report, it also shows that there was an increase of 539,555 passenger cars between 2008.....

Call To Liberalise Natural Gas Mart By 2013 - BERNAMA

WEDNESDAY, JANUARY 19, 2011 | [Comments\(1\)](#)

Call To Liberalise Natural Gas Mart By 2013 By Sajad Hussein KUALA LUMPUR, Jan 19 (Bernama) -- Malaysia should aim to liberalise the natural gas market by 2013 to allow industry players time to plan ahead to bring in their own supplies while the country is still a net producer. President of the Association of Water and Energy Research Malaysia, S. Piarapakaran, said Malaysia was expected to become a net gas importer by 2016 based on the current consumption pattern. "From.....

Mitigate flood effectively

WEDNESDAY, JANUARY 12, 2011 | [Comments\(1\)](#)

Issues related to flood and its mitigation has been raised many times. Then again climate change should not be used as a shield always. The flood prevention cost is actually shouldered to public funds such as tax collection. The delays and damage caused by it is also an additional burden. As tax payers we want to ensure proper implementation of the projects. Why the details of the projects to mitigate flood is still not made public? Some suggestion that can be considered: Revisit.....

It is haze season again

SUNDAY, JANUARY 09, 2011 | [Comments\(0\)](#)

We used to have haze as incident back then. It comes once in a while. Now, it is part and parcel of our climate. Why is it so? Who is burning this time around? Are we not discussing matters with Indonesia? Is the fire in our own backyard? Why everyone is quiet this time around? I hope relevant agency takes immediate action to find source of problem. Failure to plan is planning to fail.....

Mining money

WEDNESDAY, JANUARY 05, 2011 | [Comments\(0\)](#)

Perak government have announced that they will be reviving mining industry. On the other hand, Selangor is planning to open up a reserve forest. Now mining for money from natural resources is suddenly booming. What happened to the pledge to protect the environment? When will people with similar mindset learn? There are tonnes of metal thrown into landfills everyday. We are lacking to used resources recovery methods. We have Department of Solid Waste Management which have been approving incinerators.....

Effective Waste Management Needed - No Plastic Day

SUNDAY, JANUARY 02, 2011 | [Comments\(2\)](#)

Numerous times I have raised the importance of waste management. Fundamental question on usage of plastic; why we need it to manage our rubbish? Well, the organic waste oozes if there is no plastic holding it. This is the very reason Malaysian Plastic Manufacturers Association (MPMA) uses to defend the usage of plastic. In addition to that they use Life Cycle Assessment (LCA) result from other countries to justify their existence. This is incorrect as LCA is very much linked to manufacturing.....

COP 16 A Failure

SATURDAY, JANUARY 01, 2011 | [Comments\(0\)](#)

Environmental disasters are increasing rampantly over the years. This is a good sign that climate change will give direct impact to us. Hopefully, 2011 will assist in changes that we need. COP 16 in Cancun failed to reach a solution to continue Kyoto Protokol that will end in 2012. I do hope that all the NGOs that would like to voice their concern in COP 17, do it from your origin country. Do not contribute to CO2 by flying in bulk to COP 17 destination. Start a more strategic move!.....
