Installation Services

BearSaver installation services provide our customers with a turnkey solution available nowhere else. Our complete fabrication, delivery and installation system is a seamless, one-stop way to get your enclosures in place quickly and reliably.

Our concern for the environment is a driving factor during the installation process. The most popular method to date is the pole type install which is an effective, low impact procedure requiring only one hole in the ground.

The BearSaver installation crew, having a deep appreciation for pristine mountain environments, will make your next job easy, safe and clean. Any of our products can be installed on a pole.

Knock-outs are on the back of every enclosure for u-bolt insertion. Pole kits can be ordered separately for self-installation.

At this time BearSaver is limiting installation to the western U.S. with orders of 75+ units.
