Krishanu De

Product Manager

Product Manager and Product Owner managing a BI and Big Data teams with over a decade of experience in Business Intelligence in designing and implementing Data Warehouses and transformation projects.

Accomplishments

As a product manager, managed a big data team in Telenet, with current focus to establish a intake process, manage priorities of incoming work, increase team productivity and predictibility, improve stakeholder management and gettting things done.

As a product owner, led the DevOps initiative within Telenet Group organisation and established 2 devops teams across onsite and offshore within the BI group catering to all data management and reporting needs.

As a business analyst, analysed, designed and implemented a data mart for a Campaign Management tool in Base Company that is capable of targeting customers based on segmentation parameters like usage information, bundles purchased, reloads done, campaign response, billing information, handset purchased etc.

As a team leader, led a collocated team (Kolkata, Pune, Bangalore and Milton Keynes) of 16 developers for BT Business having the responsibility of work package allocation to ensuring delivery of the assigned work packages within delivery timeline with least possible defect.
