INT

In many instances figures developed in Excel contain trailing digits after the decimal point. In some cases only the integer is needed. Excel has a function called INT which can be used to eliminate these trailing digits. Below are brief steps on how to use this function.

	A	B
1		
2		5.389
3		

1. Above is a number which goes out the third decimal place

PRODUCT				
	A	B	C	D
1				
2		5.389	=Int(B2)	

2. Type in the = INT(Cell Address) (ex. Int(B2))

C3			
	A	B	C
1			
2		5.389	5

3. Right away the integer of data point has been derived
