400 Bad Request URL Incorrect

The URL that you're trying to convert is not valid. Your URL should start with http:// or https:// and be a properly formed URL.

Here are some examples of URLs that we CAN convert.

- http://example.com
- https://pdfmyurl.com/html-to-pdf-api
- https://www.bing.com/search?q=pdfmyurl&qs=n&form=QBRE&sp=-1&ghc=1&pq=pdfmyurl&sc=1-8&sk=&cvid=DDEFD907D4D34C909F6D07D4C5D7E968

Here are some examples where we receive data that is NOT a URL.

- example
- http:/google.com (note - the beginning is **http:/** and not **http://**)
- file:///C:/My Documents/myPage.html (note - we only allow URLs that we can reach from our servers
- http://127.0.0.1/sample.html (note - 127.0.0.1 is not YOUR server, to us it would be one of ours so that doesn't work)
- http://localhost/home/homepage.htm (note - like 127.0.0.1 this is not YOUR server, but to us it's ours)
- http://yoursite.com/sample.pdf (note - this is already a PDF! You need to pass a URL to a webpage!)

Help I need support!
